Drawer

Pull-Out Drawer Features and Benefits

Increasing stock density without increasing the amount of floor space needed to hold product
Easy for any DIY enthusiast or facilities worker to install with minimal tools required
Two different widths and four different depths
Pull-out shelf drawers incline in two different angles and one straight position for convenient replenishment of stock
Adjustable dividers separate and organise stock
Provide a superior space efficient work place with order
Provides a flexible modular system that combines efficient storage with carefully considered ergonomics
Combines with all other shop fitting solutions, freestanding, wall fixed and double sided solutions
Book shelves and other accessories hook into the system
Work surface bracket options - fix solid surface, postformed and laminated tops to a height to suit your needs
Easily adapted to the changing requirements of all types of storage
Provides efficient and logical replenishment and picking of stock
Open storage provides a good view of stock
Shorter search times
Saving space
Reduce selection errors
Permits efficient storage and work stations within a small footprint
Clear visual presentation of products with a high accessible storage capacity
System permits both horizontal and sloping angles using the same shelf component
(FIFO) stock rotation principle - First In - First Out
Stock capacity is on average three to four times more than traditional shelving
Safety release latch system for the sloping position
Extendable drawer runner to allow easy access to the rear
Heavy Duty runners with storage possibilities up to 50kg per shelf
Double Extension for bulky products
